DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to a belt scraper, classified in class 198, subclass 499.
 - II. Claims 39-57, drawn to a blade assembly, classified in class 198, subclass 497. 81-89
 - III. Claims 58-70, drawn to a torsional tensioner, classified in class 267, subclass 166. 71-80
2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination can be utilized without the specific limitations of the torsional tensioner subcombination. The subcombination has separate utility such as being able to tension any type of member including those found in particular types of vibratory conveyors..
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3651

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

5. If Group I is selected the following species requirement stands.

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, Figure 1 drawn to a scraping arrangement;

Species II, Figure 9 drawn to an alternative arrangement of the tensioning arrangement;

Species III, Figure 10A, 10B, 10C drawn to a blade holder, a scraper blade and a scraper blade holder;

Species IV, Figure 11 drawn to a snap on blade;

Species V, Figure 12A and 12B drawn to an alternative blade removal lever mechanism;

Species VI, Figure 15 drawn to an alternative scraping system;

Species VII, Figure 16A and 16B drawn to an alternative embodiment of an outer collar for the tensioning arrangement;

Species VIII, Figure 17A and 17C drawn to an alternative embodiment of a blade holder;

Species IX, Figure 18 drawn to an alternative embodiment of the scraper blade;

Species X, Figure 19 drawn to a tall scraper blade;

Species XI, Figure 20A through 20C drawn to a long-span blade holder and a snap-on scraper blade;

Art Unit: 3651

Species XII, Figure 21 drawn to an alternative blade holder;

Species XIII, Figure 22 drawn to a scraper utilized as a diverter.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

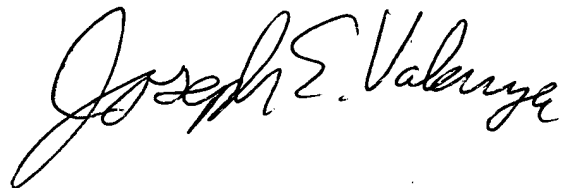

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3651

7. A telephone call was made to Dann, Dorfman, Herrell and Skillman on July 26, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rashmi Sharma whose telephone number is (703) 306-5952.
